

> WHO AM I

That's an acronym of my full name. From Madrid, Spain; Europe. I come from graphic design and front-end web development, but what really moves me is understanding how systems work underneath. That's why I'm moving into system administration, infrastructure and networking. I like building solid systems, removing the unnecessary and keeping things clean. Right now I'm focused on consolidating my scripting and linux administration skills.

> WORK EXPERIENCE

- Front-end Developer** **Vocento** 2023 - 2025
Front-end development for Vocento websites, mainly Turium, Welife and ABC. Building and maintaining responsive web interfaces using HTML, CSS, JavaScript for visual interaction and PHP for dynamic templating. Additionally, code and manage email templates for marketing campaigns.
- Hybrid Designer** **Cheil Spain** 2020 - 2022
Technical development and design of promotional digital assets for Samsung campaigns. Implementing HTML, CSS, and JavaScript to build and update online graphics and interactive elements across many retail partners and the Samsung Spain website. Ensuring visual quality brand consistency, cross-browser compatibility.
- Front-end Developer** **Amaris** 2018 (6 months)
Translating designs into responsive frontend code using HTML, CSS and JavaScript for mainly 2 web AXA apps.
- Front-layout Developer** **Nateevo (Vass Group)** 2018 (5 months)
Front-end layout development.
- Research Scholarship** **GING (ETSIT / UPM)** 2016 - 2017
Front-end development for web projects. Implementing UI designs and solving layout issues. Some of the projects I contributed to can be found here: GING Projects. Special mention to EducaInternet.

> EDUCATION

- Microcredential in Bash** **Universidad Carlos III** 2025 (1 month)
Bash shell scripting fundamentals, GNU/Linux system administration and CLI integration.
- 50h Javascript Course** **Asociación Española de Programadores Informáticos** 2019 (2 months)
A short and focused training on JavaScript, from basic to intermediate.
- 300h Web Design & Development** **Escuela CICE** 2016 (6 months)
Full-stack web development with: HTML, CSS, JavaScript, PHP and MySQL.
- Erasmus+** **Aalto University, Finland** 2015 (1st semester)
4 subjects and thanks to one of them I discovered web development.
- Graphic Design Degree** **Escuela Superior de Diseño de Madrid (ESDM)** 2012 - 2017
248 ECTS (European Credit Transfer System). 7.5/10 average grade. Curricular internship at Caser as graphic designer.

> Others	Bash [++]	GNU/Linux [++]	PostgreSQL [++]	

* I've worked with many other technologies, but those are the most noteworthy. Professionally, what I did most was making the DOM (Document Object Model) ultra-efficient, fast and maintainable. That same obsession with performance and clean systems is what I now bring to Linux based infrastructure.
